

## Video

**Orientation Guidelines:** If using a phone hold the phone horizontally.

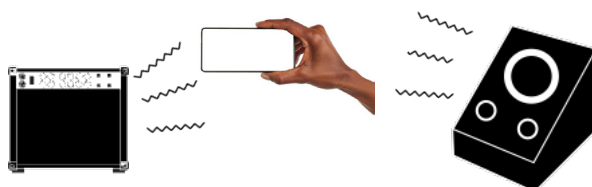

## Audio

**Ideal:** Use a condensor microphone (such as a Zoom recorder or USB Yeti) that is located in a fairly balanced location for a listener. Sync your audio and video after recording.

**If Recording Audio with Phone:** If you're moving around to record the band, be mindful not to stand too close to loud sources of sound (drums, amps, PA)

## Uploading/Sharing

When you share the video, be sure to share it at the highest quality possible.
